

Inorganic Chemistry Exchange (ICE)

Mission

Our mission is to facilitate the intellectual exchange between students of The Ohio State University and eminent scientists in the field of inorganic chemistry, with an emphasis on student-speaker interaction.

Demographic

A new organization of 5+ strongly driven graduate students in the Department of Chemistry and Biochemistry.

Organization Activities

In its inaugural year, ICE organized the first annual Malcolm H. Chisholm Workshop at The Ohio State University in honor of the late Dr. Chisholm, a renowned and beloved faculty member in the inorganic division of the Department of Chemistry and Biochemistry.

The workshop consisted of a full day of activities, starting with breakfast with the speaker in an informal round table discussion. A lecture by the speaker about their work was open to anyone interested in attending, followed by a 1-hour social of students and faculty with the speaker over lunch. Afterwards, 30-minute student and/or faculty meetings with the guest speaker were available by sign-up to share their work and stimulate discussion.

Previous Honorees

Richard R. Schrock, MIT (2019)

ICE is seeking academic or industry speakers with focus in the field of inorganic chemistry for future workshops
